AURORA\textregistered\ AFX
THE CLOSEST THING TO REAL RACING!

1996/97 Catalogue

$2.00

TOMY®
1959 - 1996 37 Years of Racing History

Way back in the late 50s, the AURORA company’s design group secretly developed some “Little Buzz Cars” to work on H.O. scale track. In developing these cars, they studied real racing cars and duplicated them into highly detailed miniature models and these were known as “Aurora Factory Experimentals”.

Rather than having the long name of “Aurora Model Motoring” they were looking for a shorter distinctive name and after some deliberation decided on the trademark AFX which is the abbreviation of Aurora Factory Experimentals, giving us the name by which this great hobby is still known today, “Aurora AFX”.

In developing these cars, special emphasis was made on speed, performance, detail and collectability, making these cars, winners with hobby enthusiasts worldwide.

Over the years, “Aurora AFX” has kept at the leading edge of development, using the latest technology available. The range now consists of over 75 highly detailed cars, and 19 different types of track, which enables up to 10 lanes of exciting racing.

2-Way Racing Plug
AURORA AFX’s exclusive two-way plug allows the direction of the race to be changed giving two completely different circuits in the one layout.

Easy To Assemble Track
AURORA AFX track is an easily assembled push-together system which cleans the contacts as the track is assembled.

Up To 10 Lanes Of Racing
The AURORA AFX system has 19 different types of track, allowing up to 10 lanes of racing. The various radius curves and straights allows a replica of almost any circuit to be made, whilst bridge supports and piers take the track into the third dimension.

Turbo Cars

Turbo Cars
Forty different styles of highly detailed cars from F-1 Cars, Indy Cars, Group C Cars, Stock Cars, Sports Cars and Fun Cars. These high performance racers give all the thrills and spills of real racing.

Lighted Cars

Turbo Lighted Cars
There are eight different highly detailed Turbo Cars which are fitted with real working headlights to experience the excitement of night racing.

Super-G-Plus

Super G-Plus Cars
Thirty different highly detailed styles of the world’s ultimate performing H.O. Scale Slot Cars: Sedans, Sports Cars, Stock Cars, Group C Cars and F-1 Cars with high performance motor with timing switch and superior ground effect magnets.

THE AURORA AFX TRACK SYSTEM

AURORA AFX Track is an easily assembled push-together system which cleans the contacts as the track is put together. This ensures a completed electrical circuit when the track is completed.

The AURORA AFX system is by far the most flexible system available with over 25 different types of track and accessories which allow up to 10 lanes of racing. The various radius curves and straights enables replicas of almost any circuit to be made, as shown in the diagram.
